

Southeast Michigan Sustainable Business Forum

1st Annual Sustainable Business Awards

The Southeast Michigan Sustainable Business Forum is announcing the 1st annual Sustainable Business Awards to celebrate the businesses that are driving our economy towards an environmentally equitable future. SMSBF will be giving out a total of 6 awards this year to small businesses, large corporations, institutions, municipal operations and others who demonstrate a highly tuned culture of sustainability.

Each applicant will be required to fill out a detailed questionnaire with 50 questions about policies, projects, and programs that the applicant has taken on to address all aspects of sustainability. This award will focus not only on being energy, water and waste efficient, but on the company's social, economic and ecological benefit to the community, the triple bottom line of sustainability.

Don't miss this chance to promote the initiatives that your organization has taken, even through these tough times, to ensure that your products and services are sustainable for generations to come.
